

CLIL Animal Zoo Game

A Sports Activity in English

Age: 8 – 10 years

Animals:

Reindeer	Chamois	Mole	Hedgehog	Wolf	Trout
Finland	France	Germany	Hungary	Italy	Greece

The children should know things about the **body, habitat, food and other things**. It is a running game which trains endurance and perception. Endurance can be trained by running in intervals and changing the speed. This Animal game is a good possibility for young children to train for endurance runs.

General aims:	<ul style="list-style-type: none">• The children train the aerobic endurance in form of an interval game.• They develop a positive attitude (fun and joy) towards running.• The children repeat the language skills they trained during their English lessons.• They train their reading skills.• The children develop a cooperative attitude towards their group members (you can only win as a group that runs and solves the questions together).
Language aims:	<ul style="list-style-type: none">• Vocabulary concerning the body, food, habitat and referring to the animals listed above. The precise vocabulary is listed on the worksheets of the children• The children should be able to read the information given on information cards.• The children should memorize the content and find it on their worksheet in their group office.• The children should sort out the information
Strategy: Sorting out	<ul style="list-style-type: none">• This game helps the children to sort out their knowledge they have gained during their English class.• The other stages such as tuning in and finding out have taken place during their English classes.
Long lasting aims	<ul style="list-style-type: none">• Children stick to the rules• Learn to orientate themselves in a room• Cooperation• Develop fun and joy concerning sports
