

Fifth standard in the Primary school Baussano

Panel discussion: Environment

Phases of the work

- ◆ Discussion about the environment and development of a mind map: animals, nature, pollution, food, weather, traditions, festivities, sport...
- ◆ Spontaneous pointing to more interesting topics: "animals" and "conservation of nature"
- ◆ Choice of a favourite topic and search of useful material (photos, pictures...) by everyone
- ◆ Pupils work in a pleasant climate of collaboration and autonomy: they agree how to work together and organize groups
- ◆ After a initial cheerful confusion, (exchange of views, agreement...), they realize their task with great enthusiasm
