

Dear Partners!

We have discussed with our five-year-old and six-year-old students “What does the word ENVIRONMENT make you think about?”. They made some pictures and they took part in such interesting discussion. In their meaning Environment is really deep subject:

-me and my family

-my home

-our kindergarten

-my friends

-garden, flowers

-forest: plants and animals

-sea

-Poland, Europe, Earth and different planets

-recycling

What was repeated a few times it was “A war”.

If they say about wars we should put this subject in our project. Difficult but true. What do you think about it? Do your children talk about war?

#### BRAINSTORMING

Games with Barbara from Finland

What does the word ENVIRONMENT make you think about?
