

## Clil activities to discover the Chamois

### **At the beginning, we work in our mother tongue:**

We start with af the school informations to complete the IC .

In groups, we collect the informations and organize them. After that, every group make a presentation of his IC, we compare them and complete a big one for the classroom. Each child has got the result of this work in his science book.

One of the children brings differents heads of animals , we can observe and compare them.

### **After that, we made few games about the chamois in English :**

1. In groups, each children has got a number, the teacher reads the text and after calls a number and gives a word. The child has to give the word to the group and they try to find the word and surround it.
2. Complete the Identity Card of the Chamois using the key-words of the text.
3. A game of associations : associate pictures with sentences.
- 4.
5. An electronic game (link with the sciences-electricity)
6. A criss-cross puzzle : we think using it for the evaluation.
