

DON'T WASTE WATER

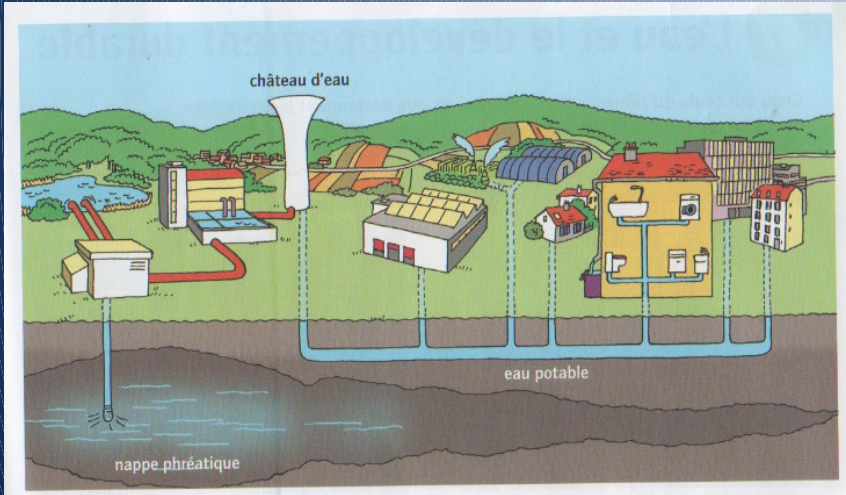

In poor countries, women get water from the well.

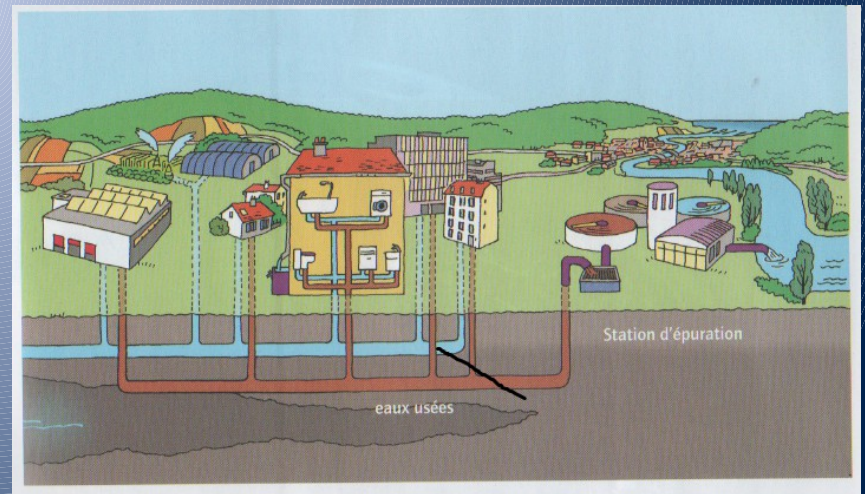

In rich countries water is supplied to a tap inside the houses.

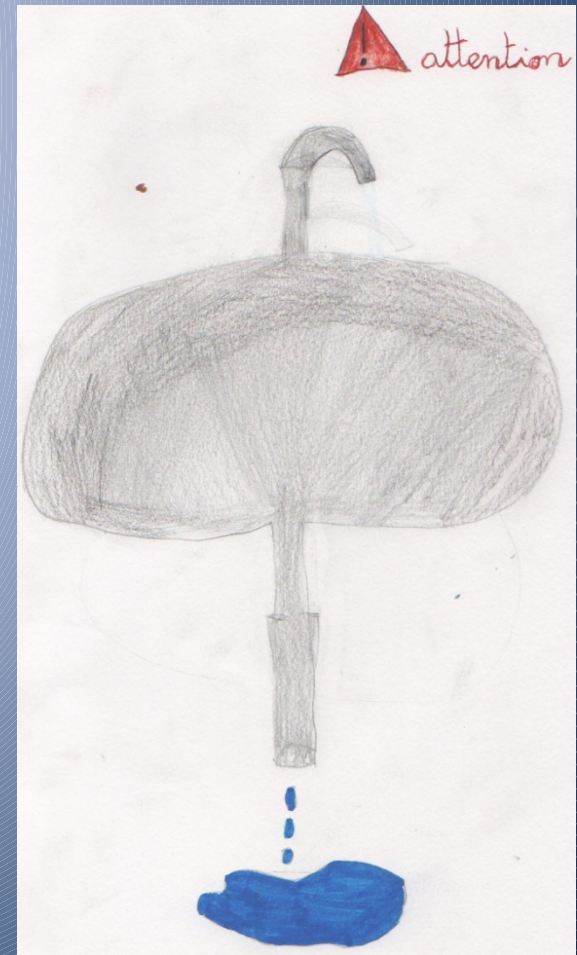

Here is the way of clean water (blue) and waste water (brown).

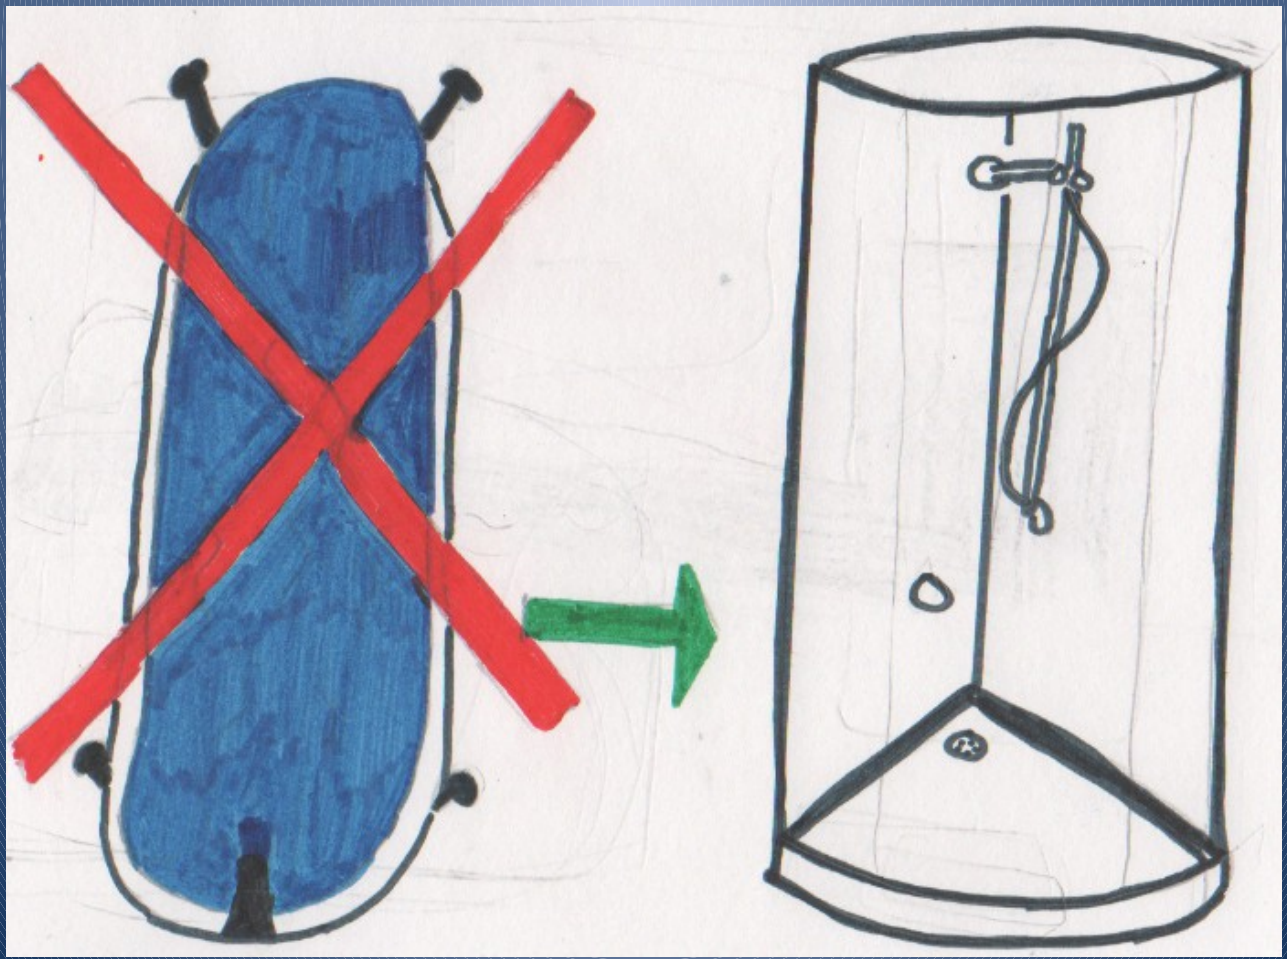

We have to clean the waste water before to put it back into the river!

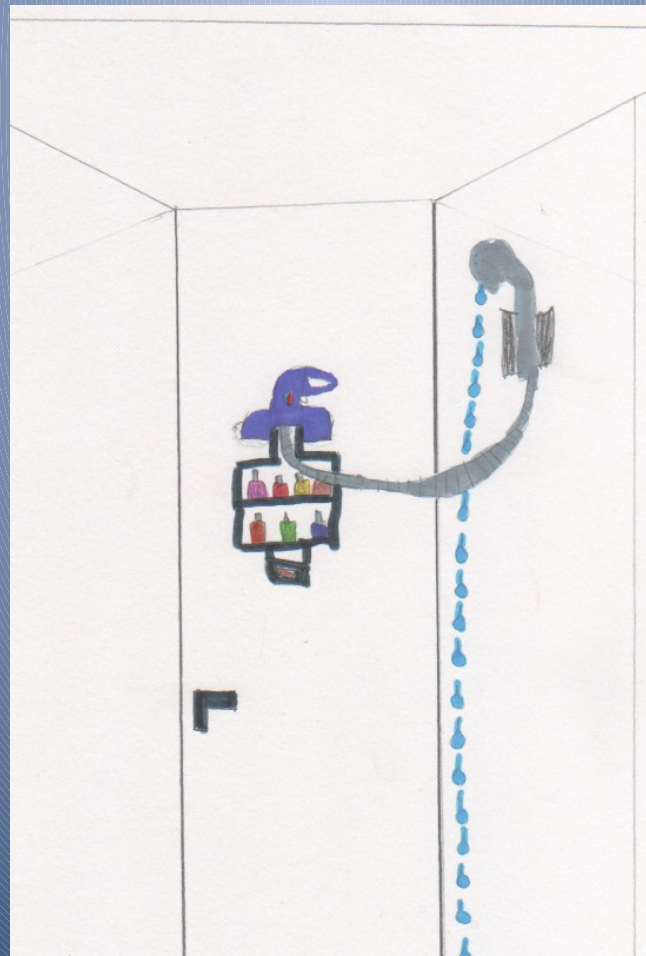

Don't waste the water, verify your home is leak-free.

Have a shower and not a bath

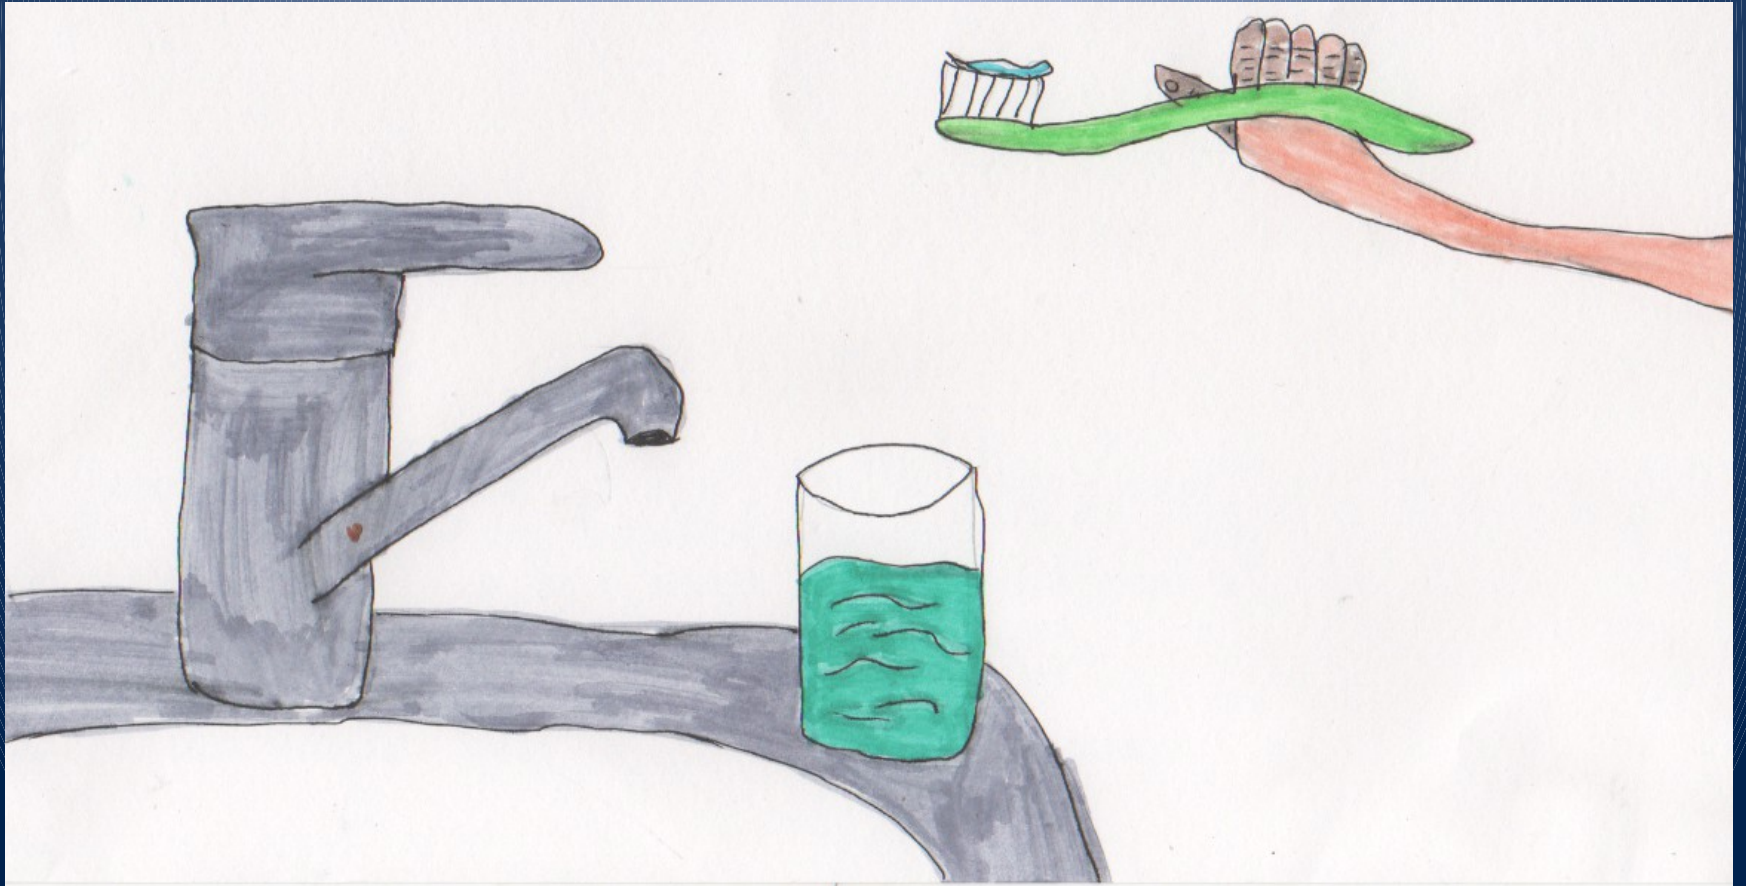

But don't forget to close the tap!

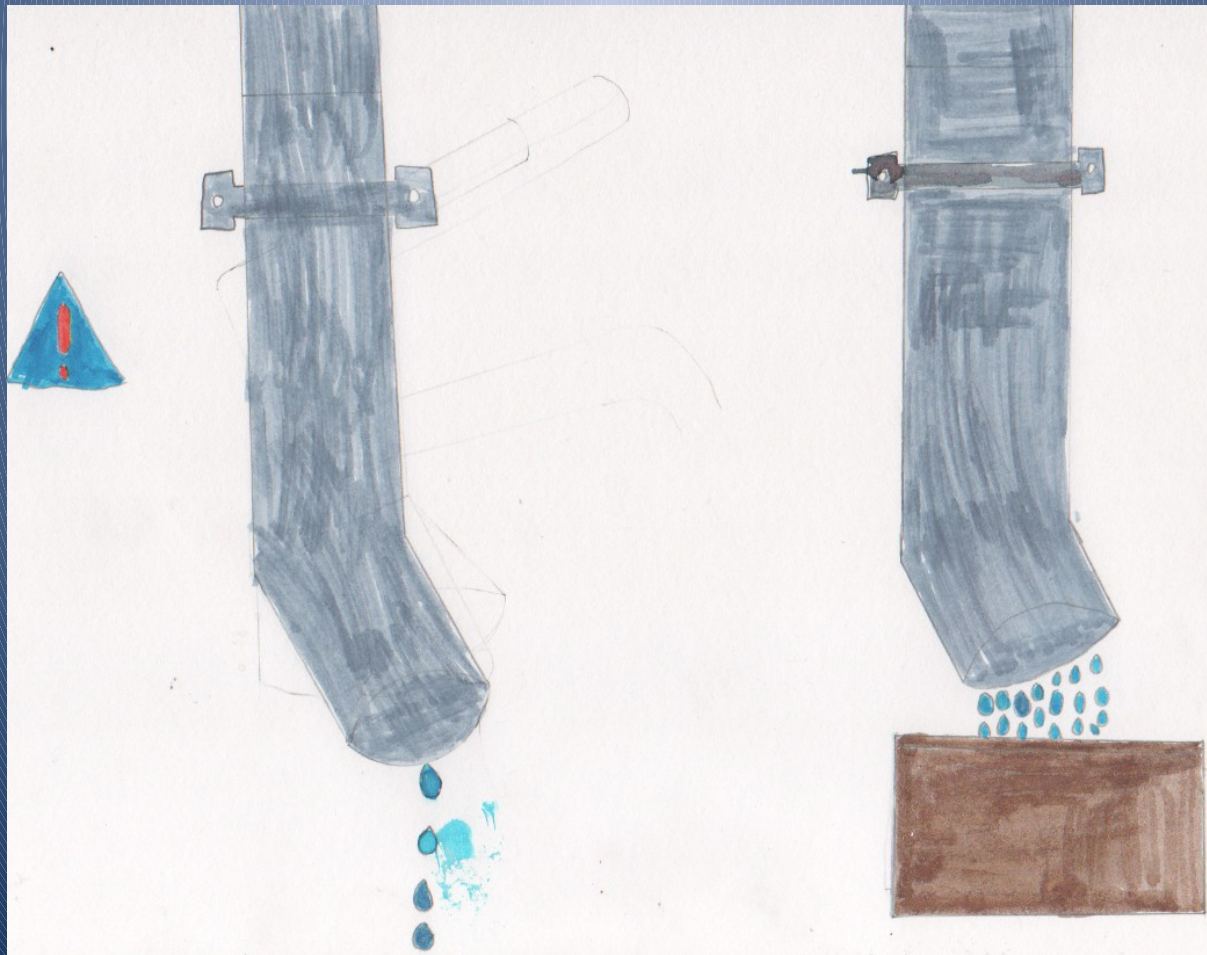

Stop water when you use the soap

Use a glass to wash your teeth

An idea: Collect rainwater

Use it to water plants and garden

Use it to clean your car...
