

DISCOVERING ANIMALS

CORSO ALBA PRE-PRIMARY SCHOOL – ASTI – ITALY

Teachers and students went in November to a farm to know animals. Pupils saw ducks, cows, horses, sheep, hens in their environment.

They have worked at school using plastic models of animals of our natural territory, playing to classify them into groups according to food, environment (water, air, wood). They learnt about the fox, the frog, the hedgehog, the boar and the hare, and then prepared drawings with these animals. They have created a memory game with the animals.
