Visiting local Forest Office

Today we went to our Forest Office to take part into educational activities “The animals from Chojnowski Forest”, connected with the project “e-CLIL 4 you”.

First we met with the forester who showed us the exhibition with models of our common animals like fox, wolf, boar, deer, hare, wild duck or stork.

Then we went with to the big room where we talked with the forester about animals, we can touch their furs and listen to their voices.

Next we went for a walk through the forest looking for animals. We met a lot of signs of boars and moles.

We had also very interesting game. In the forest there was a long bar with pictures of animals from Polish forests and we could read how far those animals could jump.

Children jumped and they compared length of their jumps with animal jumps.

Some pupils jumped like a squirrel and some like a hare.

At the end of the visit we gave them a forester certificate "e CLIL 4 you-animals". All the children got reflection jacket with pictures of animals in front and with their foot prints on the back.
