

Final activities related to CLILmeteo Romania_pre-primary

1. I've done a graph of temperature in all months from partners' countries. For each month children had to circle the highest and the lowest temperature from each country. Thus we have found which is the hottest country (Turkey) and the coldest one (Finland). The climate in Romania is moderate alike Italy, Germany, Hungary, Poland and France.

2. We drew our tree during the seasons that we had taken photos and we made a vocabulary revision about colours and seasons.
