

Pupils from „Świat Bajek” pre-school visiting

Warsaw University of Life Science

4th October two groups “Żabki”(“Frogs”) and “Tygryski”(“Tigers”) involved in “CLIL4YOU” project, visited the apple orchards of Warsaw University of Life Science.

Mr., who usually works with students of the Institute, met with us and gave us a great lesson about apples.

Students had great opportunity to hear and see WHERE APPLES COME FROM- starting from spring flowers, through cooperation with bees and others insects to smelling tasty apples.

We also visited the places where apples spend winter and thanks this, we can have fresh apples round the year.

We gave to Warsaw University of Life Science the Certificate of Cooperating in our CLIL4YOU project in activity "Tasting Clil"
