

*What do you think about the word « environment » ?*

*Students write words to illustrate what they think when they hear the word « environment ». They make a class poster in French and an other in English.*

*Students work in pairs to write what they know about the different countries involved in the project. Many students colour them in an European map. And after another collect and organise the ideas around the map.*

*On their individual copybook, students copy the final map.*
